Food Contact Statement

S717P adhesive for the EU market

Avery Dennison's adhesive S717P has been assessed by a certified third party to ensure food contact safety within the EU.

There is no harmonized adhesive regulation within the EU, therefore to ensure the food contact safety and compliance of S717P with the European Framework Regulation 1935/2004/EC, Avery Dennison relies on relevant aspects and restrictions in Regulation (EU) No 10/2011 and national legislations, such as Swiss Ordinance Annexes 2 and/or 10 or FDA 21 CFR 175.105 and/or 175.125. Based on the assessment results, the adhesive S717P is suitable for contact with dry, moist and fatty foodstuffs with a reduction factor of 4 or higher as laid down in Regulation (EU) No 10/2011 applying a surface to volume ratio of 1 dm² per kg of food. These specific use conditions are provided based on the test conditions listed in our detailed food contact statement, which is available upon request through our technical sales specialists.

Please note, it is the responsibility of the converter and of the manufacturer of the final food contact material/article, who places the finished product on the market, to check its compliance with Regulation (EC) No 1935/2004, in particular Article 3 requirements.
